THANK YOU FOR CHOOSING JAEWONCNC IROAD VEHICLE RECORDER.

This manual contains how to operate product and guide you to use correctly. Please read carefully before using product.

This manual is based on IROAD Q9 model. Please be informed that there might be some unintended errors.

Contents of the manual might be modified without prior notice.

■ Guarantee and Supporting

- Please visit our official website http://www.iroadhk.com
- Dedicated viewer, latest firmware and other product information are available for download from the website.
- JAEWONCNC is not responsible for any problem that occurs if the device is used or obtained illegally.
- Though this product records and saves footages in the event of accident, it does not guarantee every single accident scenes are fully recorded.
- Accidents scenes may not be recorded if there is minor impact on the vehicle so that the impact sensor cannot detect.
- The recordings obtained from the product might be used as a proof of accident. However, JAEWONCNC will not be responsible for any gain or loss caused by the accident.

■ Copyrights and Trademark

- This manual is legally protected by copyrights, all copyrights reserved to JAEWONCNC.
- This manual is the property of JAEWONCNC, no one is allowed to attempt to make an unauthorized copy, edit and translate the manual.
- IROAD is the trademark of JAEWONCNC. JAEWONCNC has rights to IROAD (Name, Design, Brand image), any unauthorized property use of IROAD will result in prosecution.
2. PRECAUTION

Voltage Related Issues

- Please make sure to use recommended/stable voltage only. Otherwise, misusing may cause product failure and fire accidents, explosion or damage to the vehicle.
- Do not arbitrarily disassemble and modify the product. Otherwise, it might cause damage of the product and electric shock.
- It should be considered user’s fault and void the warranty.
- Make sure that the power cable is not cut or damaged when attaching other electronic gadgets on the vehicle, otherwise, it can cause product failure or danger of electric shock, and please use qualified power cable which is produced by JAEWONCNC.
- It is highly recommended not to arbitrarily connect the uninterrupted power cable to vehicle as it can cause malfunction of the product by different conditions of vehicle and surrounding environments. (Please contact professional engineer if you need to install it).

Installation

- Do not mount Vehicle Recorder on where sight might be disturbed. It may cause an accident.
- Connect all the cables provided into right slots. Misusing would cause malfunction.

The Right Use

- Do not use Vehicle Recorder while driving. Park vehicle in safe place to use it.
- Do not force a product or its lens, otherwise, it may cause product malfunction.
- Keeps the device away from flammable or explosive stuff causing explosion and fire.
- Do not cover the device with fabric or other tools. Malfunction or fire would cause once it is overheated.
- The device can become hot if it has been switched on fora long period so exercise caution touching the unit.
- The quality of image could deteriorate while the car is passing through tunnel or at very dark night with no light.
- Recording quality might be reduced by excessive tint.
- Image quality could deteriorate when the temperature of the device exceeds the optimal operating temperature.
3. PRECAUTION

■ Management

- Turn Recorder off when exposed to direct sunlight or used for too long. Otherwise, malfunction or breakdown would occur.
- Please check whether the device is working before driving a car.
- Do not remove SD card or turn off the power cable during the firmware update. It may cause malfunction or loss of data.

■ Memory Card and Precaution

- There is the lifetime of memory card for rewriting which is expendable product.
  Some errors could occur if the lifetime of memory card reached or being stayed in high temperature environment. Periodic care is required.
- The device must be turned off when ejecting memory card.
  It may cause to erase data or malfunction of memory card when forcing switch–off while it is running.
- Keep memory card in case all the time when not in use. Please avoid places where is humid and very hot.
- Genuine IROAD memory card is recommended. Failure to use not a genuine one may cause error or malfunction of product.
  Memory card is expendable. Memory card’s warranty is 6 month period after purchase.
  It may cause to reduce life cycle of memory card if using with constant power cable.
- Please format a memory card 2 times every month for its stability.
  (Format function supported by a dedicated viewer is recommended)
- Product is only permitting recording files and Q9 program, any other files will be deleted in order to keep stability.
  (Please use the SD card for the product only, otherwise it will be deleted.)
- It takes up to 5 minutes depending on the memory capacity to use SD card if is the first time of using it.
  Please do not remove the SD card while the device is running or when it is being turned off.
# 4. PRODUCT OVERVIEW

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
</table>
| High Definition Vivid Front/Rear Full HD 2CH | Front camera has Full HD 1920x1080p 30 frames  
Rear camera has Full HD 1920x1080p 30 frames |
| Wi-Fi Support                                | Real time view and playback is supported via Wi-Fi. Settings and automatic upgrade is supported,                                             |
| ADAS - Advanced Drivers Assistance Systems  | Lane Departure Warning System (LDWS)  
Front Collision Warning System (FCWS)  
Front Vehicle Departure Warning (FVDW) |
| SAFEGUARD for All Your Safety               | Automatic low voltage cutoff function is embedded in the device for the safety of the car battery.                                         |
| Memory Card Automatic Recovery Function      | In case any error occurs, data is automatically recovered.                                                                                  |
| Night Vision                                 | Specialized more clear and sharp recording at night time                                                                                  |
| Variable Recording Mode                      | Automatic Parking Mode and Motion Detection function  
Impact, 24 hours Recording Mode                                                             |
| High Intensity Security LED                  | High intensity LED makes it possible to check outside whether product is working.  
So as to prevent beforehand vehicle theft and accident,                                       |
| Voice Recording & Voice Guidance            | High quality Sound Recording  
Clearer Voice Guidance by built-in speaker                                                   |
| External GPS                                 | Driving information through external GPS  
Time, driving path, direction with recorded video                                              |
| Dedicated PC Viewer & Smartphone Playback   | Playback recorded data, set various functions on dedicated PC viewer,  
Playback on PC and Smartphone playback available                                               |
| Firmware Update                              | Continuous improvement and performance maintain product stability.  
Easy and simple upgrade through website www.iroadhk.com or smart directly                    |

8. INSTALLATION

- Mounting a cradle for front camera

1. Fit push chase(1) from the cradle aside into hole(2) of the top of main body.

- Placing cameras

- Use dry fabric to wipe out the spot where the product will be attached on the windscreen.
- Make sure to install the product on where sight is not disturbed.

- Product Installation

1. Use soft cloth to wipe out the spot where the product will be attached (Wipe out with soft cloth or tissue)
2. Attach product
   (Remove the protective film from the adhesive tape of front/rear camera)
3. Connect the cable of rear camera
   (Connect the rear camera cable V~IN slot)

   Please make sure the cable connector is very tight that should be installed and removed more carefully
9. INSTALLATION

Product Installation

4. Connect power cable to DC-IN slot
5. Other side of cable connect to vehicle fuse or cigar jack power
   In order to install uninterrupted power cable, refer to the website www.iroadhk.com
   or look at this instruction page 10
6. Make sure that the product is operating normally
7. Clean up the power cable and rear camera wiring with cable holder or using edge part of vehicle

Connect External GPS

Connect external GPS to GPS slot of the back
It provides vehicle speed, location and other additional information
Please make sure to have some distance between main product and GPS

Inserting Micro SD memory card

- Make sure to insert sd card in the right way
Push the sd card into the memory card slot until you hear clack sound.

When using memory card for the first time or when the memory card is reused after format, the system will be in standby mode for 3~5 minutes to create system files and checking the memory card.

Recording starts with voice guide saying “Start recording”
10. UNINTERRUPTED FUSE CABLE

■ Uninterrupted Power Function?

It prevents battery discharge beforehand while in parking mode. The uninterrupted power function ensures your battery is protected. The discharge of battery voltage will be prevented in advance for 24 hours if the battery level goes down the minimum preset level.

(There might be able to occur natural battery discharge caused by the long term parking hours or each vehicle status. Please change voltage level up to high especially in winter season, refer to the instruction).

■ How to Install Uninterrupted Fuse Cable

1. Find right fuse using electric tester from fuse box of the vehicle.
2. [VCC]Line (Yellow Line) : Make sure engine’s off and connect to a current flowing fuse.
   [ACC]Line (Red Line) : Connect to fuse which should be electric current only when ignition on.
3. Connect GND line to vehicle itself which has to connect iron part of vehicle itself.
   Do not connect bolt of dash board where current is not flowing.
4. Connect the power cable to confirm the operation of product, then neatly organize cables to finish installation work.

- Before installation must check for wire color. Sometime switch (VCC, ACC, GND) wire color.
  Please refer to website www.iroadkr.com for the details of uninterrupted power installation, contact a technician for accurate installation.
- Please do switching test (Driving mode <-> Parking mode ) before wiring.
# 11. PRODUCT OPERATION

- Menu and function can be changed without prior notice by sudden firmware upgrade or product enhancement.

## Product Operation

### Button Scenario Guide

<table>
<thead>
<tr>
<th>Button Scenario</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Power OFF**   | - Press and hold the button A for 5 seconds long.  
- “Shut down the system.” will be signaled, and the device will be powered off. |
| **Power ON**    | - Press and hold the button A for 5 seconds long.  
- “Start recording.” will be signaled, and the device will be powered on. |
| **Wi-Fi OFF**   | - Press the button A for 1.5 seconds long. “Ding” sound will signal.  
- “Wi-Fi power is off.” will be signaled, and Wi-Fi connection will be unavailable. |
| **Wi-Fi ON**    | - Press the button A for 1.5 seconds long. “Ding” sound will signal.  
- “Wi-Fi power is on.” will be signaled, and Wi-Fi connection will be available. |

※ When 'Wi-Fi OFF', the consumption power is reduced by 0.3w and the device operating time is increased by 10%.  
※ 'Wi-Fi ON/OFF' function allowing Users to turn Wi-Fi power on/off. Do not confuse it with 'Wi-Fi registration button'.  
   When connecting to a smartphone, you must press 'Wi-Fi Registration Button'.  
※ Smartphones that have already been registered previously, Users do not have to re-registered even if the Wi-Fi on/off function is used.  
※ Default settings - Wi-Fi function is ON.
# Button Scenario Guide

- Press the button B shortly. “Ding-dong” sound will signal.
- “Stand-by mode for the registration.” will be signaled, and Wi-Fi connection can be initiated.

## Wi-Fi Stand-by Mode OFF
- Press the button B shortly. “Ding-dong” sound will signal.
- “Stand-by mode for the registration is released.” will be signaled, and Wi-Fi connection cannot be initiated.

## Audio Recording OFF
- Press the button B for 3 seconds long. “Ding-dong” sound will signal.
- “Stop recording the voice.” will be signaled, and will be recorded without audio.

## Audio Recording ON
- Press the button B for 3 seconds long. “Ding-dong” sound will signal.
- “Start recording the voice.” will be signaled, and will be recorded with audio.
## Recording Mode

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>

</table>
Memory Card Directory

**Config**
- System Folder
  - Log.txt: Saved device status
  - System.cfg: Saved device settings
  - Version.ini: Saved version information

**Data**
- Normal (Driving) Recording Folder
- Normal recordings are being saved into this folder. The number of files being saved depends on the capacity of the memory card.

**Event**
- Event(Impact) Recording Folder
- Recorded data of events (Impact, Parking, Motion) recording will be saved into this folder.

**Update**
- Firmware Folder
- Allow user to manually update the device firmware using the update file downloaded from our website.

**Viewer**
- Viewer Setup Program
1. Application will prompt an update message when the PC viewer program is being installed for the first time as shown on the picture above.

2. If the user selects the upgrade button, it will automatically download the upgrade file into the memory card.

3. Make sure the power cable is disconnected from the device first before inserting the memory card.

4. Once the memory card is being inserted into the device, connect the power cable and start the engine.

5. The device will format by itself and will prompt a message "Re-installing the program, please do not turn off the power."

6. Once the device is being rebooted, this means that the update is done.
17. FIRMWARE UPDATE

- Menu and function can be changed without prior notice by sudden firmware upgrade or product enhancement.

**Automatic Update [Wi-Fi]**

![Message Pop-up]

1. Confirm the device is properly registered
2. Message Pop-up will be appeared when press the "Firmware Update" button on IROAD Application
3. Press "OK", Update will begin automatically
4. Please do not turn off smartphone and product while updating
5. Once update completed, the device is rebooted and restart recording
18. FIRMWARE UPDATE

- Firmware updates for new function or product improvement will not have prior notice, please visit the website regularly for any updated information.

Manual Update

Update

1. Disconnect the power cable.
2. Remove the memory card from the device and insert it into the card reader. Afterwards, insert the card reader into the PC. Once it is done, copy the downloaded firmware file into the memory card under the folder named “Update”.
3. Insert the memory card back into the device.
4. Connect the power cable back into the device (DC-IN) port.
5. Turn on the engine. Make sure the engine is on.
6. The device will update and format by itself and the LED light will start to flicker. It will then prompt a message “Re-installing the program, please do not turn off the power.”
7. Once the update is done, the device will reboot and starts recording.
19. INSTALLATION & RUNNING THE VIEWER

- Firmware updates for new function or product improvement will not have prior notice, please visit the website regularly for any updated information.

**Program Installation**

1. The viewer software is not pre-set up in the memory card.
2. Connect power to the product after inserting Micro SD card. Recording time could differ depending on the capacity of SD card.
3. Take 3~5 minutes to initialize and create the file system when first use.
   (All LED flicker while initializing, There will be REC on when it starts recording after finishing) Insert the SD card into PC.
4. Run viewer.exe which is saved in the memory card.

**Running the Program**

1. Confirmation pop-up window appears if there is internet connection as picture shown.
   If there is no internet connection, IROAD VIEWER will run directly.

2. Press “run a viewer” icon to start viewer program.

3. Open File - Click the icon in the viewer to browse folder window as shown in the picture. Select removable disk, press "OK" button.
20. DEDICATED PC VIEWER

- Firmware updates for new function or product improvement will not have prior notice, please visit the website regularly for any updated information.

**Overview**

1. Front/rear image playback screen
2. Google Map (Only when connected with external GPS)
3. Recording File List
4. Adjust playback speed

21. DEDICATED PC VIEWER

- Watching Front/Rear Image

- Firmware updates for new function or product improvement will not have prior notice, please visit the website regularly for any updated information.

Click the icon to watch front/rear image
Click the icon to watch both front/rear in half
Click the icon to watch front/rear PIP
22. DEDICATED PC VIEWER

- Firmware updates for new function or product improvement will not have prior notice, please visit the website regularly for any updated information.

■ Enlarging a Screen

Double left click (mouse) on the main menu screen to expand to full screen.
Click the left button (mouse) to return to previous screen again.

■ Partial Enlargement of a Screen

Magnifier will appear, when right click (mouse) in playback screen.
You can move the enlarged screen by holding the left button (mouse)
and drag the screen to view other area of the recording.
The Magnifier will disappear if click the right button (mouse).
### Repeating Event Playback

- Click "repeat event" icon to activate repeat function from the main viewer screen.
- Section bar is activated.
- Select start and end point to playback repeatedly.
- This function is only available in a playback section.

### OSD

- The information of speed, date and time are displayed in the lower left section of the viewer during playback.
- The date and time notation is applied to all backup files.
- Switch to thumbnail function if click the icon in the main viewer screen.
- This screen is composed of 16 pictures in total and each of the screen shows one scene.
- It show enlarged full screen if double-click the specific each of scene.
- Playback, Play backwards also show 1 to 16 pictures sequentially.
- Return back to normal mode if click the icon again.

- Click to the icon to “Drawing a lane” mode.
- User can apply the lane manually.
- Click the icon and choose 'deactivating lane drawing to deactivate it.
- Click the “Backup” icon in main screen menu.

- Backup settings provides a various type of video recording downloads such as AVI, Multi AVI, JDR, Multi JDR, JPEG, BMP and G sensor formats.

- AVI format file can be played on Windows Media Player or other Third-party Player as long as the player able to support the file format.

- JDR format file can be played back with dedicated IROAD viewer only.

- Images file can be opened with Image viewer or other image application.

- To download multi recording for AVI, selected the recording user wish to download by the time and date.

- Download will begin after selecting a download folder/path follow with the next button.

- AVI backup is available to use tamper-resistant function.

- User will be able to select download with audio or without by checking or unchecking the Audio Save button.
**System Settings**

1. **Normal (FPS)** – Setting for Frame Per Second for normal recording.
2. **Event (FPS)** – Setting for Frame Per Second during event recording.
3. **Brightness** – Adjust the brightness of recording. 
   There are 3 settings for brightness: Darkness / Default / Bright.
4. **Reverse (Rear)** – Save with reversed image.
5. **Night Vision** – ON / OFF is available.
6. **Audio Recording** – Enable/Disable audio when recording.
7. **Buzzer** – Alarm will sound when event have occurred (Available to ON/OFF).
8. **Auto Reboot** – Auto Reboot – Reboot the device at the pre-set time so that the system will do a check on the memory card and also the device system.
9. **Security LED** – Select on/off (Only for front camera).
10. **High Temperature Shutdown** – When the temperature limit is reached (75 °C) in parking mode, the power is cut off to protect the product.
11. **Speed Meter Display** – Change distance notation, KM or Miles. 
12. **Use Auto-Off Timer** – After entering the parking mode, the power is cut off by setting timer.
13. **Timer Setup – Auto-Off timer setting**.
14. **Standard Time Zone** – Select exact time zone.
Event Settings

1. Event - Activate/Deactivate Impact/Parking/Motion function
2. Event Recording Time
   - Recording after an event: Able to set the recording after an event happen. (Available between 1~30 seconds)
3. Impact - Set the sensitivity for impact. (G-Sensor)
4. Parking - Set the sensitivity during parking mode. (G-Sensor)
5. Event Storage Capacity - Set the capacity storage for Event folder and Normal folder.

CAUTION: If this setting is changed all recorded data is deleted.
2. ADAS Settings

1. ADAS: On / Off
2. LDWS: On / Off
3. FVDW: On / Off
4. FCWS: On / Off
5. Sensitivity of LDWS: Low / Normal / High
6. Sensitivity of FCWS: Low / Normal / High
7. Speed of Land Departure: 50, 60, 70km/h
29. DEDICATED PC VIEWER SETTING

User Settings

- Setup(H:/config/system.cfg)

1. Vehicle Info - Save vehicle information
2. Driver Info - Save drivers information
3. Serial Info - Enter product serial number
